# Highway 3 project was considered low priority by provincial experts

Trevor Wilhelm

Published Dec 01, 2022 • 3 minute read

A new report from Ontario's auditor general reveals the provincial government approved four road projects, including Highway 3, while ignoring its own technical and engineering staff who considered the plans low priority.

Migrant Worker Program

A photograph of a bicycle repair shop. In the foreground, three bicycles are parked on a concrete sidewalk against a light-colored concrete wall. From left to right: a green bicycle with silver fenders, a black and red 'Supercycle' bicycle, and a red bicycle with 'FALCON' written on the frame. In the background, a black metal railing runs along a raised platform. Behind the railing, several other bicycles are parked, including a blue and yellow one, an orange one, and a blue one. A brick building with a dark roof is visible in the background under a clear blue sky.
